11 - 75 kW / 15 - 100 HP (50Hz)

A Tradition of Reliability

ELGi, established in 1960, designs and manufactures a wide range of air compressors. The company has gained its reputation for design and manufacture of screw compressors through strategic partnerships and continuous research and development. Over the years, it has emerged as a multi-product, multi-market enterprise providing total compressed air solutions in all segments. ELGi's design capabilities translated into a wide range of products ranging from oil-lubricated and oil-free rotary screw compressors, reciprocating compressors and centrifugal compressors. ELGi has its own manufacturing operations in India, Italy and USA with subsidiaries in Australia, Brazil, UAE and Indonesia. The company is fast expanding its global footprint attracting distributors and customers with its latest generation products.

Robust Infrastructure

ELGi has modern manufacturing facilities equipped with advanced high precision grinding machines, turning centres and CNC horizontal and vertical machining centres. Screw airends are manufactured with the latest rotor grinding technology, coupled with measurement technology to maintain precise manufacturing tolerances. ELGi's manufacturing plants are both ISO and EOHS certified. The products are manufactured under controlled environment to ensure that its quality continues to meet the highest standards.

Innovative Technology

Screw Compressor elements are manufactured in-house using state-of-the-art machining centres for rotor grinding and machining castings of various sizes. ELGi's own eta-V profile rotors ensure energy-efficient compressed air supply for all demanding applications. ELGi is one of the few companies capable of manufacturing wide range of airends and compressor packages in the world. ELGi's patent portfolio is a testament to the company's continuous research and innovation capability

AIR UP.

UPTIME™ comes standard on every EG Series Compressor

UPTIME Design

This speaks to the engineering and design of our products. Our R&D is dedicated to designing machines that run cooler, cleaner and longer... that are easy to service... with longer service intervals.

UPTIME Components

For so many of our customers, seeing is believing. They know a quality-built machine when they see it. That's why every part on a ELGi compressor is a quality part. From our proprietary air ends, to our use of leak-free hoses and piping.

UPTIME Assurance

Here is where we back our pledge, Our industry leading warranties, parts availability and call centers staffed by experts assure peace-of-mind to our customers.

Two-Stage Air Filtration
Increased life of consumables

High Volumetric Efficiency
Low energy cost per cfm

Advanced Neuron III Controller (Remote management of compressor operations)
Ready for SCADA/DCS

Highly Efficient Motor
Energy cost savings

Option of In-built Dryer and VFD
Compact and saves floor area

Enclosure Designed to Industrial Standards
Silent, aesthetic package

Robust Cooling System
Reduced air outlet temperature

Safety Compliant Package

Superior Technology Airend
Gearless* and reduced sound

EG Series - The Technology Edge

*for selected models only

All images shown are for illustration purposes only. Actual product may vary, due to product enhancement.

EG Series

The Eco-friendly
Energy-efficient compressors

Save energy
High efficient airend

ELGI's airends are equipped with in-house developed eta-V profile rotors, with 4/5 lobe combination, the rotors are designed to run at optimum speeds. This unique design reduces pressure losses and increased efficiencies. The rotors ensure energy-efficient compressed air supply for all demanding applications.

- Precise rotor clearances for best-in-class energy efficiency
- Low operating speeds for long life, low maintenance and low sound level
- Complies with applicable safety standards

Reduced starting load
Intake valve system

The new generation intake valve with integrated blow down unit, solenoid controls and actuators is designed for low losses. Intake valve optimally controls the compressor capacity during startup reducing the no-load power. This optimal capacity control results in direct savings on power consumption

Oil-Less Air(1 ppm)* Efficient air-oil separation with OSBIC(3 Stages)

ELGi has applied unique OSBIC process (Oil Separation By Impact and Centrifugal action) which enables efficient separation of air and oil, with minimum pressure drop. The method enables separation of oil in three stages, delivering consistent oil-free air while increasing the life of separator element

* as per ISO Standards

Moisture-Free Air 99% Water Free

Depending on the humidity level of inlet air, bulk water remains in compressed air at varying levels and causes corrosion of piping, end tools, machinery and valves. EG Series air compressor has a custom-designed centrifugal type moisture separator with an automatic drain. This comes as a part of the package at no extra cost and removes over 99% of bulk water from the compressed air, resulting in corrosion free, longer life of end use equipments and less load on the dryer

Cool Air Efficient air cooling

The cooling system with fans and larger cooling surface area enhances the cooling of hot air. The fan motor uses significantly low power. The integrated fan-motor assembly maintains low temperature there by increasing the life of motor. Smart cooling system design enables easy maintenance and ducting. More over, the complete system is insulated internally from other zones

Robust and Reliable Reliability under extreme conditions

EG series compressors are designed to perform at extreme temperatures - from cold to hot and from dry to extremely humid conditions

Performance Control System

- Built-in Dryer Dew Point integration
- VFD Parameter (Power, HMR, Frequency, Ampere, Voltage)
- Read out and closed loop control
- Selectable AO (Pressure/Temperature/Dew Point) for DCS integration
- Controlled drain system

Reports

- Cumulative Report (Run hours, load hours, unload hours, stop hours, fault hours and remaining AFCT, OFCT, OSCT, OCT and RGT)
- Detail Report - Previous 15 days (Load hours, unload hours, stop hours, fault hours, and number of times machine stopped due to standby)
- Fault Report - (Previous 99 faults in chronological order with real time stamping and type of fault)

Remote Monitoring

- **DCS (MODBUS RTU/RS 485):** controller is enabled to synchronize with distributed control system - control of compressor from control panel of customer
- **SCADA :** compressor control through PC with remote monitoring by supervisory control and data acquisition process

Safety and Protection

Global Series compressors are designed and perfected to ensure highest level of safety for

- Pressure regulating valve
- High pressure
- High temperature
- Pressure relief valve
- Phase order and single phase

Compressor Near Point of Use

Compressors can be placed anywhere in assembly area without any special foundation

- Low Sound
- Low Vibration
- Compact

ELGi Airmate Accessories

Airmate Particulate Filter

Air Flow : 35 - 3,200 cfm (1 - 90 m³/min)
 Working Pressure : 100 - 190 psig (7 - 13 bar g)
 Filtration Range : 1 - 0.003 microns

Airmate Air Receiver

Capacity : 250 - 10000 ltrs
 Working Pressure : 100 - 190 psi g (7 - 13 bar g)
 Code of Construction: ASME sec. VIII Div.I or IS 2825

Drain Valves

Timer controlled and zero loss
 Capacity : 50 to 2000 cfm
 Working Pressure : 100 - 190 psig (7 - 13 bar g)

Cooler Pre-filter

Available for all the models as an optional accessory

After Sales Solutions

A wide range of After Sales products and services is designed to add maximum value for our customers. Our fast serviceability ensures optimum availability and reliability of the compressors with the lowest possible operating costs

Genuine Spares and Service

ELGi Genuine Spares helps in avoiding unexpected compressor failures and the risk of consequential damage to other vital compressor components. ELGi spares are designed, manufactured and checked for quality to meet the standards of a new compressor. The spares undergo continuous improvement to provide best results and are available through the vast network of ELGi dealers in India and International markets

ELGi Air Audit

ELGi Air Audit help's in improving the performance of the compressors by identifying the areas of wastage in the system. ELGi's air audit services are offered in areas including generation, distribution and demand side systems

Genuine Spares

For enhancing performance and productivity

Superior Air Quality

In-built air treatment (optional)

In-built ELGi Airmate Refrigerant Air Dryer*

The in-built ELGi Refrigerant Air Dryer uses eco-friendly refrigerant and its optimal design meets dew point of 3°C** The design ensures safety with minimum pressure drop and maximum thermal efficiency. Dryer designs meet ISO 8573 standards for performance.

Designed for high inlet (55°C) and ambient (45°C) temperatures

- Energy efficient rotary gas compressor
- 3 in 1 Heat exchanger bringing in efficiency and compactness to dryer package.
- Internally grooved condenser which increases heat transfer efficiency and brings compactness to the package
- Energy loss due to pressure drop is nil
- Non-cyclic control ensures stabilized dew point for various input load
- Eco-friendly gas - R407C keeps environment unpolluted
- Single door access for routine check up and preventive maintenance

*Please contact ELGi's nearest sales office for integrated dryer options
**100% Relative humidity @ 28°C *

Energy Saving - The CONSERVE Way

In-Built ELGi **CONSERVE™** Variable Frequency Drives (VFD)

Matches compressor output with demand by varying motor speed. The power consumption reduces in line with the reduction in demand. This Helps in eliminating the frequent load-unload cycle and also the wasted power from the energy bill.

A fixed speed compressor operates on a load unload band of at least 10 psi around the working pressure whereas with ELGi VFD, compressor can be operated within a band of 2 psi. Since the compressor is not operated under higher than working pressure requirements, there is substantial energy saving. For every 2 psi reduction in operating pressure, there is 1% power saving.

In a fixed speed compressor with Star-Delta starter, starting current is as high as three times the full load current (FLC). With ELGi VFD starting, starting current is less than the FLC. This helps to avoid using heavy rated components like fuses, MCCB, cable size, generator rating, isolators etc.

For compressed air systems with fluctuating demand pattern, giving a fast return on investment .

Advantages:

Electrical:

- Low starting current
- High efficiency
- Improved power factor
- Reduced maximum demand

Mechanical:

- Minimum maintenance
- Smooth start
- Smooth control

10 Year Life-Cycle Cost

Compressor without VFD

Compressor with **CONSERVE™**

■ Electricity Cost ■ VFD Saving
■ Equipment Cost ■ Maintenance Cost

Note:

Free Air Delivery(FAD) is tested as per ISO 1217 : 2009 Annexure C Edition: 4
 All standard models are air-cooled
 Sound level measures as per ISO 2151, Second Edition at 1m distance in field conditions, +/- 3dB(A)
 Due to continuous improvements, the specifications are subject to change without prior notice
 Product images displayed in this brochure are only representative and may not exactly match the actual product
 FAD values are provided at corresponding working pressure values
 Length, breadth and height dimensions include integrated dryer

Note:

Free Air Delivery (FAD) is tested as per ISO 1217 : 2009 Annexure E Edition: 4

All standard models are air-cooled

Sound level measures as per ISO 2151, Second Edition at 1m distance in field conditions, +/- 3dB(A)

Due to continuous improvements, the specifications are subject to change without prior notice

Product images displayed in this brochure are only representative and may not exactly match the actual product

FAD values are provided at corresponding working pressure values

Length, breadth and height dimensions include integrated dryer

Compressed air solutions for all sustainable air needs

AB series oil free screw
11 - 110 kW / 29 - 560 cfm

Oil free series screw
45 - 450 kW / 181 - 2518 cfm

EG series rotary screw
11 - 250 kW / 49 - 1540 cfm

EN series rotary screw
2.2 - 45 kW / 9.0 - 280 cfm

Electric portable (Trolley)
22 - 132 kW / 126 - 550 cfm

Diesel portable (Trolley)
185 - 1200 cfm / 100 - 350 psig

Diesel portable (Skid)
400 - 1500 cfm / 175 - 400 psig

Oil free recip
0.75 - 22 kW / 3.25 - 90 cfm

Oil lubricated recip
1.0 - 40 hp / 2.0 - 128 cfm
